Dear Mike,

I'm not in a position to evaluate the enclosed but if you do not know the computer mavens by now Gary should know quite a few.

Who knows? Maybe they are onto something -other than smoke.

When your series was dubbed for me someone used a T15 cassette, so it cut off just as soon as the camera had Revill about to say something.

I'd still like the entire interview and your full series.

Thanks and best,

Harold
